To whom it may concern,

I have had the pleasure of working with Mr. Gary Ulias of Gary Ulias and Associates for over a year, during which time he has provided my interior design business with excellent support in the areas of construction management and design build. His professionalism and commitment to a project has been a major factor in completing some very time sensitive and budget conscious projects together.

Gary is very organized, efficient and extremely competent when it comes to dealing with large scale design build projects. He possesses extensive knowledge on construction details and understands the critical deadlines, dealing resourcefully and competently with site issues as they may occur.

Gary has established an excellent rapport with the many trades, providing him the ability to negotiate cost savings due to his long standing relationships. His strong connections with leading suppliers allow him to negotiate on behalf of the client and his communication skills, both verbal and written, are an asset to managing a project and all its intricacies.

In summary, I can confidently recommend Gary and his company as a solid and reliable project manager and expert in his field.

Yours Sincerely,

Claudia Heidary
